

Silver Ghost

Hi my name is Finian Hurley I live in Manch. My Grandad Pat McSweeney who lives next to me. He owns lots of vintage cars and one of them is the Silver Ghost. about Silver Ghost: 1906 Rolls Royce produced four chassis to be shown at the Olympia car show. The show cars were not fully finished and examples were not provided to the press for testing until March 1907. A three-speed transmission was fitted at first with with four speed-units used from 1913. Electric lighting became an option in 1914 and was standardised in 1919. Also my Grandad said it was used in 1916 to shoot the British.

The End
